Marine-El er en autoriseret el-installatør, der arbejder med alle former for el ombord på skibe, i industrien og hos private. Projekter i alle størrelser udføres professionelt fra projektering til test hos kunden. Dokumentation foregår på eget CAD program, der gør det let og hurtigt at tilrette tegninger m.v.

Marine-El har stor erfaring med styring af vacuum-pumpeanlæg, generatorer og hovedmotorer men tilbyder alt el arbejde inden for:

Belysning

Indeklima

Alarm & sikring

Styring

- Opbygning og montering af styretavler sker på eget værksted
- PLC-styringer og programmering af f.eks. temperaturskrivere udføres i huset, hvilket altid giver kunden mulighed for at vende tilbage til et tidligere projekt for evt. rettelser og ud-bygning

Kommunikation

- Bredbåndsforbindelser til internet og tv, ip-telefoni, dørtelefoner med videoovervågning m.v.

Rådgivning

- I forhold til forbedring og evt. lovliggørelse af eksisterende installationer

Desuden råder Marine-El over eget testudstyr til afprøvning af generatorfelter i hovedtavler samt tryk- og temperaturmåleudstyr for pressostater og termostater.

Marine-El is an authorized electrician, who works with all kinds of electricity on board ships, in the industry and in private households. Projects in all sizes are carried out professionally from design to test at the customer. Documentation is made in own CAD programme, which makes it easy and quick to adjust drawings etc.

Marine-El has extensive experience of control of vacuum pumping equipment, generators and main engines but offers all electrical work within:

Lighting

Indoor climate

Alarm & security

Control

- Construction and mounting of control panels is carried out in own workshop
- PLC controls and programming of for example temperature recorders is carried out in-house, which always gives the customer the possibility to return to a previous project for corrections and extension if required

Communication

- Broadband connections to internet and television, IP telephony, entry phone with video monitoring etc.

Consulting

- On improvement and legalization if required of existing installations

Furthermore, Marine-El has test equipment for check of generator fields in main control panels plus pressure and temperature measuring equipment for pressure monitors and thermostats.
